Maker Fair

A Maker Fair is a celebration of innovators, makers, doers from the fields of arts, science, technology and engineering coming together to showcase their products to the local community. It is an event which inspires anyone and everyone to become a maker. The aim of Maker Fair is to entertain, inform, connect, learn and share ideas.

Maker Fair 2016 invites you to exhibit your projects as products and models. An exhibit of these projects will give the spectators a great opportunity to learn and understand new concepts. Apart from learning, the program helps in building a strong network among the participants which will help further in their professional development.
